

Shared-contact hulls: bounded rank retry

6 rejections • 0 histories • 0 qualified references

Scene	Fraction	Rows	Outcome	Residual (m/s)
8 hulls, seed42	0.06	48	Rejected	1.14757e-06
8 hulls, seed42	0.03	51	Rejected	0.000628979
8 hulls, seed42	0.015	30	Rejected	1.77666e-06
27 hulls, seed7301, rotating	0.06	216	Rejected	4.49071e-07
27 hulls, seed7301, rotating	0.03	192	Rejected	1.96514e-05
27 hulls, seed7301, rotating	0.015	123	Rejected	0.00597088

Same shared contact geometry, material and strict $1e-8$ m/s law gate as the preceding study.

Only numerical Jacobian increment rank changes; physical mobility and friction remain unchanged.

Solving the earlier captured contact system does not qualify the full hull trajectory.

All levels and failed matrix snapshots retained; independent archive audit passes.
