

Shared contact-point hull follow-up

6 attempts rejected • 0 histories • 0 qualified references

Scene	Travel fraction	Rows	Rejected residual (m/s)
8 hulls, seed 42	0.06	48	1.14757e-06
8 hulls, seed 42	0.03	48	1.20994e-08
8 hulls, seed 42	0.015	30	1.77666e-06
27 hulls, seed 7301, rotating	0.06	216	4.49071e-07
27 hulls, seed 7301, rotating	0.03	192	1.96514e-05
27 hulls, seed 7301, rotating	0.015	123	0.00597088

Residual gate: 1e-8 m/s. Original geometry, material, effort ladder and physical gates retained.

Changed discretization: both bodies apply each contact force at one shared world point.

This fixes wrench geometry; it does not qualify either full random-hull shaking trajectory.

Every rejection and matrix snapshot is retained. No skipped levels or friction-law fallback.
